### Project Experience

#### EisenhowerList | React, Typescript and Local Storage

<https://eisenhowerlist.netlify.app/>

- Eisenhower list is a todo list where you should save your todos in eisenhower matrix form. Now just enabling the feature of your's completed and active todos.
- Learning Exposure :** I have learn various concepts of React such as components, hooks and state management and by using Typescript, I improved type safety and easily maintainability in my code.

#### TaskManager App | Dart, Flutter, Firebase and other plugins

- TaskManager is a flutter application that is used to manage, organize, and keep track of your tasks, activities, and goals. In this application, you can organize your tasks as a priority, running and completing them in respective tabs.
- Learning Exposure:** I have learned various concepts of Flutter and Dart such as widgets, state management, working with API in Flutter, and navigation routes.

#### Tempersion | HTML, CSS and Vanilla Javascript

<https://farhandotdev.github.io/Tempersion/>

- Tempersion is a temperature calculator that is used to convert Celsius to Kelvin and Fahrenheit and vice-versa.
- Learning Exposure:** I have used HTML, CSS, and Vanilla Javascript to build tempersion project.

## Dad jokes | HTML, CSS, Javascript and API

<https://farhandotdev.github.io/Dadjokes/>

- Dad jokes provide the best jokes that make you laugh and your day!  
**Eg** – Child: Dad, make me a sandwich. Dad: Poof! You're a sandwich. **Is it a good one or not**
- **Learning Exposure:** I have used vanilla javascript to make an **API call**, HTML, and CSS for structuring and designing the **UI**.

## PirateTranslator | HTML, CSS, Javascript and API

<https://pirateworld.netlify.app>

- Pirate Translator is a translator used to translate English phrases into Pirate language
- **Learning Exposure:** I have used vanilla javascript to make an API call to translate English phrases into pirate language, HTML, and CSS for structuring the **UI**.
